

Making a seal

Tools: Scissors, glue

1 Make the head.

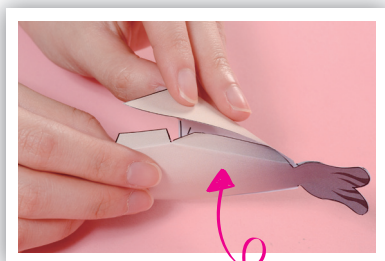

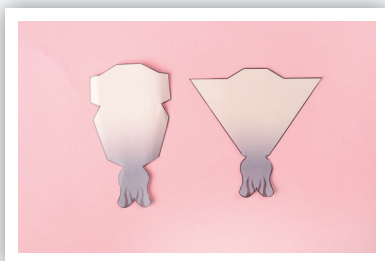

Cut along the outline of all the parts. Don't cut the dotted lines — leave the glue tabs for assembling.

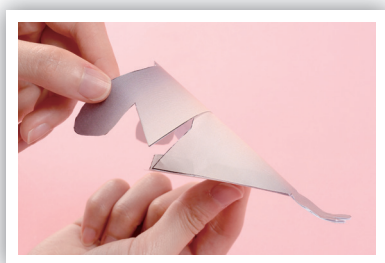

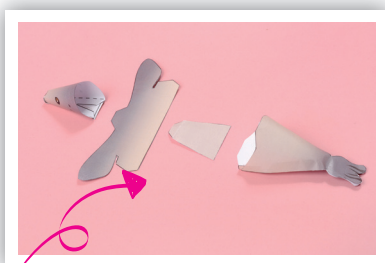

2 Make the tail.

Attach the thin strip below the nose with the glue tabs on both sides.

3 Assemble the seal.

Attach the glue tabs to give the tail its shape.

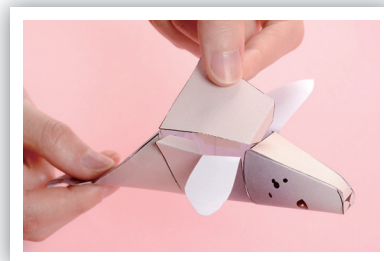

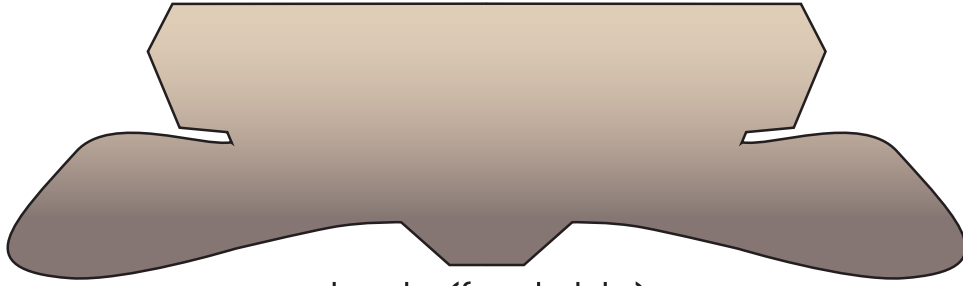

Attach the parts in the following order:
tail → body → head.

Complete!

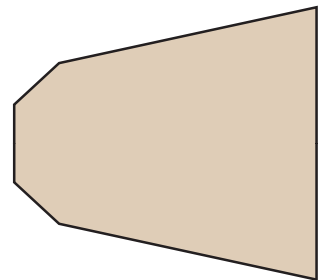

It looks alive!

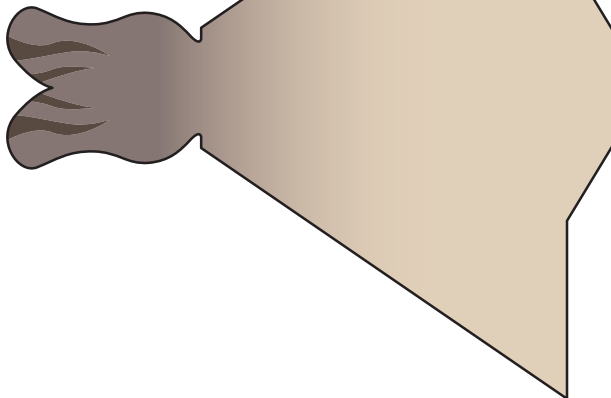

body (front side)

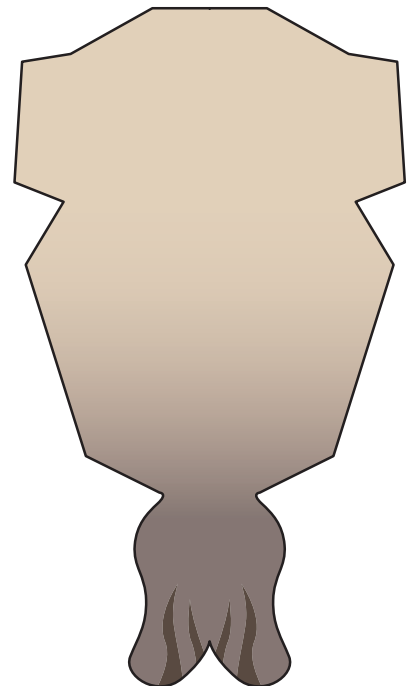

body (back side)

tail ①

tail ②

head
